

USE THIS ADDITIONAL INFO TO JUST IMPROVE THE AI CONFIRMATION THAT ALREADY EXISTS :

PROFESSIONAL HIGH TICK / LOW TICK LOGIC FOR DERIV

On [Deriv](#), High Tick / Low Tick contracts are micro-directional momentum contracts.

You predict whether the:

- next tick will be HIGHER than current tick
OR
- next tick will be LOWER than current tick

This is one of the fastest forms of synthetic index trading.

Success depends on:

- tick pressure
 - micro momentum
 - volatility rhythm
 - acceleration behavior
 - entry timing
-

UNDERSTANDING HIGH TICK / LOW TICK

HIGH TICK

You win if:

`Next tick > current tick`

LOW TICK

You win if:

`Next tick < current tick`

CORE PRINCIPLE

This is:

micro-momentum trading

NOT:

- long-term trend prediction
- candle forecasting
- support/resistance trading

You are trading:

immediate next-tick pressure

BEST MARKETS

Market	Quality
Volatility 10 (1s)	Excellent
Volatility 25 (1s)	Excellent
Step Index	Very Good
Volatility 10 Index	Very Good
Volatility 25 Index	Good
Volatility 75 Index	Risky
Volatility 100 Index	Dangerous

BEST PROFESSIONAL STRATEGIES

1. MICRO MOMENTUM CONTINUATION

(BEST OVERALL)

Best Markets

- V10 1s
 - V25 1s
-

Concept

Short-term tick pressure often continues briefly.

Example:

↑ ↑ ↑ ↑

Probability temporarily favors:

another upward tick

HIGH TICK ENTRY

Enter HIGH TICK when:

- 3–4 consecutive upward ticks
- tick speed accelerating
- no downward hesitation
- bullish pressure clean

Trade:

HIGH TICK

LOW TICK ENTRY

Enter LOW TICK when:

- 3–4 bearish ticks
- downward acceleration strong
- no bullish interruption

Trade:

LOW TICK

Best Duration

1 tick

2. TICK IMBALANCE REVERSAL

(PROFESSIONAL LEVEL)

Best Markets

- V25
 - Step Index
-

Concept

Extreme same-direction pressure eventually exhausts.

Example:

↑ ↑ ↑ ↑ ↑ ↑

Momentum becomes stretched.

Probability shifts toward:

temporary reversal

LOW TICK REVERSAL

After aggressive bullish run:

enter LOW TICK

HIGH TICK REVERSAL

After aggressive bearish sequence:

enter HIGH TICK

Important Filter

Take ONLY if:

- sequence extended excessively
 - tick speed slowing
 - momentum weakening
-

Best Duration

1 tick

3. COMPRESSION BREAKOUT LOGIC

Best Markets

- V25
 - V50
 - Step Index
-

Concept

Small compressed movement often leads to directional burst.

Example:

tiny alternating ticks

followed by:

strong directional impulse

HIGH TICK ENTRY

If:

- bullish breakout tick appears
- acceleration immediate
- follow-through visible

Trade:

HIGH TICK

LOW TICK ENTRY

If:

- bearish breakout tick strong
- momentum expanding downward

Trade:

LOW TICK

Best Duration

1 tick

4. PULLBACK FAILURE CONTINUATION

Best Markets

- V10
 - V25
 - Step Index
-

Concept

Weak counter-moves usually fail during strong momentum.

HIGH TICK SETUP

Example:

UP trend → tiny bearish tick → immediate bullish pressure

Trade:

HIGH TICK

LOW TICK SETUP

Example:

DOWN trend → tiny bullish retracement → bearish continuation

Trade:

LOW TICK

Best Duration

1 tick

5. STEP MOMENTUM EXPLOIT

(BEST FOR STEP INDEX)

Best Market

- Step Index
-

Concept

Step Index often trends smoothly in short bursts.

HIGH TICK

If:

higher step progression

continues steadily,

trade:

HIGH TICK

LOW TICK

If:

lower step progression

dominates,

trade:

LOW TICK

Best Duration

1-2 ticks

BEST INDICATOR COMBINATIONS

1. EMA MICRO STACK

(BEST OVERALL)

Settings

Indicator	Setting
EMA Fast	3
EMA Medium	5
EMA Slow	9

HIGH TICK CONDITIONS

- EMA 3 above EMA 5
- EMA 5 above EMA 9
- momentum accelerating

Trade:

HIGH TICK

LOW TICK CONDITIONS

- EMA 3 below EMA 5
- EMA 5 below EMA 9
- bearish pressure strong

Trade:

LOW TICK

2. RSI PRESSURE FILTER

Settings

Indicator Setting

RSI 7

HIGH TICK

Take HIGH TICK when:

- RSI above 55
 - momentum rising sharply
-

LOW TICK

Take LOW TICK when:

- RSI below 45
 - bearish momentum accelerating
-

BEST DURATION SETTINGS

Market	Best Duration
V10 1s	1 tick
V25 1s	1 tick
Step Index	1–2 ticks
V25	1–2 ticks
V75	1 tick

BEST BEGINNER SETUP

Recommended Market

Volatility 25 (1s)

Configuration

Component	Setting
Strategy	Momentum Continuation
Observation	4 ticks
Duration	1 tick
EMA Filter	3/5/9
Risk	0.5%
Entry Type	Immediate

PROFESSIONAL ENTRY FILTERS

Take HIGH/LOW TICK trades ONLY when:

- tick pressure clear
 - momentum aligned
 - no violent spike chaos
 - market rhythm stable
 - acceleration visible
-

AVOID THESE CONDITIONS

Do NOT trade:

- sideways alternating ticks
 - random volatility spikes
 - laggy execution
 - emotional revenge entries
 - weak momentum structure
-

HIGHEST PROBABILITY CONDITIONS

Strongest HIGH/LOW TICK setups:

1. Momentum continuation
2. Pullback failure
3. Compression breakout
4. Step momentum progression
5. Exhaustion reversal

These produce the cleanest micro-directional opportunities on synthetic indices at [Deriv](#).

STUDY AND LEARN THIS INFO :

PROFESSIONAL “ONLY UPS” & “ONLY DOWNS” LOGIC FOR DERIV

On [Deriv](#), “Only Ups/Only Downs” trading is a specialized momentum-continuation approach.

You are NOT predicting:

- candle color
- last digits
- long-term trend

You are predicting:

continuous directional tick movement

UNDERSTANDING ONLY UPS / ONLY DOWNS

ONLY UPS

You win ONLY if:

every tick moves upward

during contract duration.

Even:

1 downward tick

causes loss.

ONLY DOWNS

You win ONLY if:

every tick moves downward

during duration.

Even:

1 upward tick

causes loss.

MOST IMPORTANT PRINCIPLE

This contract is:

pure momentum trading

NOT normal Rise/Fall trading.

You need:

- directional acceleration
- clean momentum
- low retracement probability
- volatility expansion
- immediate continuation

BEST MARKETS

Market	Quality
Volatility 10 (1s)	Excellent
Volatility 25 (1s)	Excellent
Step Index	Very Good
Volatility 10 Index	Very Good
Volatility 25 Index	Good
Volatility 75 Index	Risky
Volatility 100 Index	Dangerous

BEST PROFESSIONAL STRATEGIES

1. PURE MOMENTUM BURST

(BEST OVERALL)

Best Markets

- V10 1s
- V25 1s

Concept

Strong tick acceleration often continues briefly.

Example:

UP → UP → UP → UP

Momentum pressure:

buyers dominating temporarily

ONLY UPS ENTRY

Enter ONLY UPS when:

- 4+ consecutive bullish ticks
- tick speed accelerating
- candles expanding
- almost no retracement visible

Trade:

ONLY UPS

ONLY DOWNS ENTRY

Enter ONLY DOWNS when:

- 4+ bearish ticks
- downward acceleration strong
- bearish pressure continuous

Trade:

ONLY DOWNS

Best Duration

1 tick

Maximum:

2 ticks

2. BREAKOUT EXPANSION CONTINUATION

(PROFESSIONAL LEVEL)

Best Markets

- Step Index
 - V25
 - V50
-

Concept

Compression zones create explosive directional release.

Example:

small candles + tight range

then:

large breakout candle

ONLY UPS SETUP

If:

- bullish breakout candle strong
- breakout closes near top
- momentum immediately continues

Trade:

ONLY UPS

ONLY DOWNS SETUP

If:

- bearish breakout candle large
- no bullish rejection
- downward acceleration immediate

Trade:

ONLY DOWNS

Best Duration

1-2 ticks

3. MICRO-PULLBACK REJECTION

Best Markets

- V25
 - Step Index
-

Concept

Strong trends reject weak retracements.

ONLY UPS ENTRY

Example:

UP trend → tiny bearish candle → instant bullish continuation

Enter:

ONLY UPS

ONLY DOWNS ENTRY

Example:

DOWN trend → tiny bullish pullback → bearish continuation

Enter:

ONLY DOWNS

Important Filter

Pullback MUST be:

small and weak

If retracement strong:

avoid trade

4. TICK PRESSURE IMBALANCE

(BEST FOR 1S)

Concept

Rapid same-direction ticks create temporary imbalance.

ONLY UPS

If tick flow:

↑ ↑ ↑ ↑ ↑

with:

- strong speed
- no hesitation
- no alternating ticks

Trade:

ONLY UPS

ONLY DOWNS

If:

↓ ↓ ↓ ↓ ↓

Trade:

ONLY DOWNS

Best Duration

1 tick

5. VOLATILITY EXPANSION MOMENTUM

Best Markets

- V75
 - V100
-

Concept

After volatility expansion,
direction often continues briefly before exhaustion.

ONLY UPS

If:

- explosive bullish candle
- momentum acceleration
- no upper rejection wick

Trade:

ONLY UPS

ONLY DOWNS

If:

- aggressive bearish candle
- strong downside momentum
- no lower rejection

Trade:

ONLY DOWNS

Important

This strategy is:

high risk

Use:

small stake only

BEST INDICATOR COMBINATIONS

1. EMA MOMENTUM STACK

(BEST OVERALL)

Settings

Indicator	Setting
EMA Fast	5
EMA Medium	9
EMA Slow	21

ONLY UPS CONDITIONS

- EMA 5 above EMA 9
- EMA 9 above EMA 21

- candles bullish
- momentum accelerating

Trade:

ONLY UPS

ONLY DOWNS CONDITIONS

- EMA 5 below EMA 9
- EMA 9 below EMA 21
- bearish momentum strong

Trade:

ONLY DOWNS

2. RSI + MOMENTUM FILTER

Settings

Indicator **Setting**

RSI 14

Momentum Default

ONLY UPS

Take ONLY UPS when:

- RSI above 60
 - momentum rising sharply
-

ONLY DOWNS

Take ONLY DOWNS when:

- RSI below 40
 - momentum falling aggressively
-

BEST DURATION SETTINGS

Market	Best Duration
V10 1s	1 tick
V25 1s	1 tick
Step Index	1–2 ticks
V25	2 ticks
V75	1 tick

BEST BEGINNER SETUP

Recommended Market

Volatility 25 (1s)

Configuration

Component	Setting
Strategy	Momentum Burst
Observation	5 ticks
Duration	1 tick
EMA Filter	5/9/21
Risk	0.5%
Entry Type	Immediate continuation

PROFESSIONAL ENTRY FILTERS

Take ONLY UPS/DOWNS trades ONLY when:

- directional momentum clean
 - volatility structured
 - no opposing rejection
 - tick acceleration visible
 - market rhythm stable
-

AVOID THESE CONDITIONS

Do NOT trade:

- sideways chop
 - alternating ticks
 - weak candles
 - slow markets
 - emotional revenge trading
 - laggy execution
-

HIGHEST PROBABILITY CONDITIONS

Strongest ONLY UPS/DOWNS entries:

1. Momentum burst
2. Compression breakout
3. Pullback rejection
4. Tick imbalance
5. Volatility expansion continuation

These create the cleanest continuous directional opportunities on synthetic indices at [Deriv](#).

STUDY THIS INFO AND ADJUST WHERE RIGHT ,

PROFESSIONAL RISE/FALL LOGIC FOR DERIV

Rise/Fall trading on [Deriv](#) is fundamentally different from digit trading.

You are no longer predicting:

last digit behavior

You are predicting:

short-term directional momentum

Professional Rise/Fall trading requires:

- volatility reading
 - tick momentum analysis
 - micro-trend structure
 - candle compression analysis
 - timing precision
 - market rhythm recognition
-

CORE PRINCIPLE OF RISE/FALL

RISE

You win if:

Exit price > Entry price

FALL

You win if:

Exit price < Entry price

BEST MARKETS FOR RISE/FALL

Market	Quality
Volatility 25 Index	Excellent
Volatility 10 Index	Excellent
Step Index	Excellent
Volatility 50 Index	Very Good
Volatility 75 Index	Medium
Volatility 100 Index	Risky
Volatility 75 (1s)	Dangerous
Volatility 100 (1s)	Very Dangerous

BEST PROFESSIONAL STRATEGIES

1. MICRO-TREND CONTINUATION

(BEST OVERALL)

Best Markets

- V25
 - V10
 - Step Index
-

Concept

Short-term momentum tends to continue briefly before reversal.

Example:

Higher highs + higher lows

indicates:

short bullish continuation

RISE Entry Rules

Take RISE when:

- 3+ bullish candles appear
- candles closing strongly
- pullbacks weak
- tick momentum stable

Trade:

RISE

FALL Entry Rules

Take FALL when:

- 3+ bearish candles appear
- lower lows forming
- weak bullish retracements
- bearish tick pressure visible

Trade:

FALL

Best Duration

Market	Best Duration
V10	3–5 ticks
V25	5 ticks
Step Index	5–8 ticks

2. PULLBACK CONTINUATION STRATEGY

(PROFESSIONAL LEVEL)

Best Markets

- V25
 - V50
 - Step Index
-

Concept

Markets rarely move straight continuously.

Strong trends pull back briefly before continuing.

RISE Setup

Example:

UP → small DOWN pullback → UP continuation

Enter:

RISE after weak bearish pullback

FALL Setup

Example:

DOWN → small UP retracement → DOWN continuation

Enter:

FALL after weak bullish retracement

Confirmation Filters

Take entry ONLY if:

- retracement candles weak
 - original trend stronger
 - volatility stable
-

Best Duration

5 ticks

3. VOLATILITY EXPANSION BREAKOUT

Best Markets

- V75
 - V100
 - Boom/Crash
-

Concept

Compression often leads to explosive movement.

Example:

small candles + tight range

followed by:

strong breakout candle

RISE Entry

If:

- market compresses
- strong bullish breakout appears
- momentum accelerates

Trade:

RISE

FALL Entry

If:

- compression breaks downward
- bearish expansion candle appears

Trade:

FALL

Best Duration

3-5 ticks

4. TICK MOMENTUM PRESSURE

(BEST FOR 1S MARKETS)

Best Markets

- V10 1s
 - V25 1s
-

Concept

Rapid directional ticks create temporary momentum imbalance.

RISE Setup

If ticks move:

UP UP UP UP

with strong speed,

enter:

RISE

FALL Setup

If:

DOWN DOWN DOWN DOWN

enter:

FALL

Important

This is:

momentum scalping

NOT long-term trend trading.

Best Duration

1-2 ticks

5. REVERSAL EXHAUSTION STRATEGY

Best Markets

- V25
 - V50
 - Step Index
-

Concept

Strong trends eventually exhaust.

Signs:

- momentum weakening
- smaller candles
- repeated rejection wicks

- slowing tick speed

FALL Reversal

After strong rise:

bullish exhaustion appears

Trade:

FALL

RISE Reversal

After strong decline:

bearish exhaustion appears

Trade:

RISE

Best Duration

5-8 ticks

BEST INDICATOR COMBINATIONS

1. EMA + RSI

(BEST BEGINNER SETUP)

Settings

Indicator Setting

EMA Fast 9

EMA Slow 21

RSI 14

RISE Conditions

- EMA 9 above EMA 21
- RSI above 50
- bullish candles strong

Trade:

RISE

FALL Conditions

- EMA 9 below EMA 21
- RSI below 50
- bearish candles strong

Trade:

FALL

2. BOLLINGER + MOMENTUM BREAKOUT

Settings

Indicator	Setting
Bollinger Bands	20
Momentum	Default

Logic

Compression inside bands:

market preparing expansion

Breakout:

enter direction of breakout

BEST DURATION SETTINGS

Market	Best Duration
V10 1s	1–2 ticks
V25 1s	2–3 ticks
V10	3–5 ticks
V25	5 ticks
Step Index	5–8 ticks
V75	3–5 ticks

BEST PROFESSIONAL SETUP FOR BEGINNERS

Market

Volatility 25 Index

Setup

Component	Setting
Strategy	Pullback Continuation
Duration	5 ticks
EMA	9/21
RSI Filter	Above/Below 50
Risk	1%
Max Entries	3

PROFESSIONAL ENTRY FILTERS

Take trades ONLY when:

- market rhythm clear
 - volatility readable
 - momentum aligned
 - no chaotic spikes
 - candle structure clean
-

AVOID THESE CONDITIONS

Do NOT trade:

- random sideways chop
 - emotional revenge entries
 - violent spike candles
 - unstable connection
 - overtrading sessions
-

MOST IMPORTANT PROFESSIONAL PRINCIPLE

The real edge in Rise/Fall is NOT:

guessing direction randomly

The edge is:

- trading only structured momentum
- waiting for clean setups
- aligning volatility + trend + timing
- protecting capital during bad conditions

That is what separates disciplined traders from gamblers in synthetic index trading on [Deriv](#).
